NICKNAME

OPERATIONS

April 2007—Members of the 127th Medical Group deployed for a one-year deployment in support of Operation Jump Start. The operation saw the deployment of National Guard forces along the U.S.-Mexican border to bolster U.S. Customs Border Patrol agents. Guardsmen typically provided administrative and civil engineering support for the operation and were not involved in actual law enforcement.

June 2008—13 members of the 127th Medical Group, deployed to Aiuksne, Latvia for two-weeks to offer medical assistance and assessment for needy people. Services provided included dental and optical work.

May 2009—26 members of Selfridge's 127 Medical Group, Battle Creek's 110th Medical Group and Alpena's Combat Readiness Training Center deployed to Latvia for two-weeks to work with Latvian Army and local healthcare professionals in providing free optometric and dental services to the people of Aluksne and Liepaja. This was the second year the Michigan Air National Guardsmen deployed to the region as a part of the State Partnership Program between Michigan and Latvia.¹⁷⁸ Since 1993, the State Partnership Program couples U.S. states with allied nations for training, the nature of which is determined by the needs of the region. This program allows commands that frequently make combat deployments (such as EUCOM) to meet their training objectives.¹⁷⁹ A case in point was Poland's recent combat deployment to Iraq. Polish troops were trained by Illinois ANG personnel, which allowed the guardsmen to participate in national emergencies, while still meeting their combat deployment commitments in Iraq.

June 2010—37 members of the 127th Medical Group deployed to Tripler Army Medical Center, HI. for Overseas Annual Training. While there, 127th Medical Group personnel processed over 400 Army soldiers who were on a real world deployment.
