EMBLEM

EMBLEM SIGNIFICANCE

The wing patch depicts the ash of Mount St. Helens spewing out of the mountaintop. There are a total of three green mountain peaks, two of which are snow capped and the third is the volcano erupting. The peaks are set against an azure blue sky with a bright yellow sun rising from between two of the peaks. A white plume of ash rises from the volcano. Directly below the scalloped band of red and white are six yellow five-pointed stars arranged on a deep ultramarine

blue background. The shield is piped or bordered in Air Force yellow
