NICKNAME

OPERATIONS

The mission of the 151st Civil Engineers is to program, design and construct new facilities as well as to provide operation and maintenance support for facilities at the 151st Air Refueling Wing and at five associate units. The Civil Engineers train to meet a wartime requirement of constructing airbases using pre-stored bare base equipment (Harvest Eagle), and to provide battle damage repair of facilities and runways. Also, to support the flying mission during wartime, the engineers furnish fire protection and airbase operability management. Operation Enduring Freedom and Iraqi Freedom resulted in the Civil Engineers being activated to support operations. A mission change allowed the 151st CES to provide infrastructure support for the extremely busy and important Ramstein Airbase, Germany.

On the home front, the Engineers completed a busy and stressful year with the continuation and completion of two new buildings, a Headquarters and Composite Maintenance Building, and the final renovation of several more.

Air Force Order of Battle
