MOTTO

OPERATIONS

The 901 Com Flight accomplished their training at Robins AFB, Georgia. This site afforded the Communications personnel an opportunity to receive comprehensive training in all phases of their assigned specialties. The training thus received-culminated in the Flight's satisfactory

performance during the ORI in September. Emphasis will be placed in coming months in efforts to obtain an adequate site for next year's encampment due to the inability of the home station to provide all facets of required training.

the 901 Communications Flight, supported the fixed base communications facilities at Wright-Patterson AFB, Ohio, where the unit performed duties in the base communications center, teletype and crypto-maintenance shop, provided central office telephone maintenance duties, and worked at the base telephone switchboard. 1971
