EMBLEM

On an Air Force golden yellow disc within a black border nebuly, fimbriated of the first, edged of the second, a black silhouetted head of a Greek warrior in profile, wearing an Air Force golden yellow helmet, details and outlines black; on the helmet's visor three black lightning bolts fesswise. (Approved, 19 Apr 1957)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The globe represents the unit's worldwide reach. The sword and knight chess piece symbolize the flexibility provided by the unit in supporting Air Force intelligence missions to defend the nation.

EMBLEM SIGNIFICANCE

MOTTO

NICKNAME

OPERATIONS

The 10 Intelligence Squadron operates the multisource intelligence collection and dissemination contingency airborne reconnaissance system (CARS), deployable ground station-one (DGS-1). Deployed or in garrison, DGS-1 is used to conduct information operations and integrates into the theater command, control, communications, computer, and intelligence (C4I) architecture. It provides multisensor, correlated, near-real-time information warfare products to warfighting command elements in peace, crisis, and war.

The 10th Intelligence Squadron has two subordinate operating locations: OL-CP, in Chesapeake, Va., supporting multiservice Project Crosshair; and OL-FK in Norfolk, Va., providing cryptologic support to the United States Atlantic Command.

Combat in CBI, 5 Jun 1944-28 Mar 1945, and Western Pacific, 10 May-14 Aug 1945.

The Air Force Intelligence Command began support to CARS/DGS-1 on 27 August 1992 with the activation of the 600th Electronic Security Squadron at Langley AFB.

On 10 October 1994, Iraqi troop movements along the Iraqi-Kuwaiti border resulted in CARS/DGS-1 being tasked to provide intelligence support in Saudi Arabia. Thus, soon after the contingency system became operational, a total of 331 personnel deployed with the system to the

Saudi desert where it supported AFCENTCOM operations in Southwest Asia. While in Saudi Arabia, DGS-1 intelligence specialists processed, exploited and disseminated data derived from U-2R missions.

To provide necessary intelligence support to U.S. military operations in the Persian Gulf area, the DGS-1 team remained on forward deployment for 34 months, in harm's way and competing with warfighters for logistic support. All but nine of the DGS-1 team returned home to Langley AFB in 1997 with no degradation in intelligence support operations.
