# 1373 MAPPING AND CHARTING SQUADRON

#### MISSION

1373 Mapping and Charting Squadron evaluate the results of data brought back by flight crews but it also aids in the planning of surveying projects.

The squadron is divided into Data Control and Photographic Divisions. Both of which support training missions at the home base in addition to projects in the field.

The plans and reconnaissance branch designs the Hiran networks and checks on the suitability of the sites. The analysis branch evaluates the techniques and procedures used on Hiran projects.

The training branch provides schooling designed to turn airmen fresh from Basic Training into data computers by teaching them mathematics and allied subjects

The five computations branch supply teams to go out on projects and handle the data brought back by flight crews, perform net adjustments and otherwise handle the mathematical aspects of projects here and abroad.

The photographic division is presently operating on a three pronged basis.

Personnel of the photo division process evaluate title index and shop photographs produced in the course of training and of projects around the world. Its personnel are attached to all aerial survey teams.

#### LINEAGE

1373 Mapping and Charting Squadron

### **STATIONS**
