EMBLEM

The emblem is a triangle with a three-dimensional "22" on a red field in the upper part of the emblem. A saber with navigator wings in the center and globe on the end of the hilt is below the red field pointing toward the center of the field. Eight red, gold, blue, and silver rays emanate

from the center of the squadron's emblem. The emblem's triangular shape compares the squadron's strength and solidarity to one of the sturdiest geometrical shapes—the triangle. The emblem's dominant color is red, symbolizing courage. The saber, with the navigator's badge and globe, represent strength and readiness. The class-colored light rays, converging to a point on the horizon, symbolize unity among all the classes of the Cadet Wing.

NICKNAME

Double Deuce

OPERATIONS

The mission of the USAF Academy is to educate, train, and inspire men and women to become officers of character motivated to lead the United States Air Force in service to our nation.

The cadet student body is designated the Cadet Wing. The wing is composed of four groups consisting of 10 squadrons each, with about 110 cadets assigned to a squadron. Each squadron consists of members of all four classes.

The United States Air Force Academy offers a four-year program of instruction and experience designed to provide cadets the knowledge and character essential for leadership, and the motivation to serve as Air Force career officers. Each cadet graduates with a Bachelor of Science degree and a commission as a second lieutenant in the Air Force.

Cadets are exposed to a balanced curriculum that provides a general and professional foundation essential to a career Air Force officer. Special needs of future Air Force officers are met by professionally oriented courses, including human physiology, computer science, economics, military history, astronautics, law and political science.

The core curriculum includes courses in science, engineering, social sciences and humanities. Cadets take additional elective courses to complete requirements for one of 25 major areas of study. About 60 percent of the cadets complete majors in science and engineering; the other 40 percent graduate in the social sciences and humanities. Some of the most popular majors include management, astronautical engineering, international affairs and political science, history, behavioral science, civil engineering, aeronautical engineering, electrical engineering and engineering mechanics.
