EMBLEM

The emblem depicts an eagle on a blue, inverted triangle with black borders. The black and white eagle, clutching a gold lightning bolt, soars above a white globe. A Polaris star, surrounded by two atomic rings, shines above the eagle, and the gold numerals "24" are directly below. The eagle symbolized the virtues of strength, courage, and character each cadet strives to attain. The lightning bolt represents the global responsiveness of the Air Force. The North Star, Polaris, acts as a guiding light to cadets in their pursuit of knowledge. The Atom symbolizes the dominant role of knowledge and technology in the modern Air Force.

OPERATIONS

The mission of the USAF Academy is to educate, train, and inspire men and women to become officers of character motivated to lead the United States Air Force in service to our nation.

The cadet student body is designated the Cadet Wing. The wing is composed of four groups consisting of 10 squadrons each, with about 110 cadets assigned to a squadron. Each squadron consists of members of all four classes.

The United States Air Force Academy offers a four-year program of instruction and experience designed to provide cadets the knowledge and character essential for leadership, and the motivation to serve as Air Force career officers. Each cadet graduates with a Bachelor of Science degree and a commission as a second lieutenant in the Air Force.

Cadets are exposed to a balanced curriculum that provides a general and professional foundation essential to a career Air Force officer. Special needs of future Air Force officers are met by professionally oriented courses, including human physiology, computer science, economics, military history, astronautics, law and political science.

The core curriculum includes courses in science, engineering, social sciences and humanities. Cadets take additional elective courses to complete requirements for one of 25 major areas of study. About 60 percent of the cadets complete majors in science and engineering; the other 40 percent graduate in the social sciences and humanities. Some of the most popular majors include management, astronautical engineering, international affairs and political science, history, behavioral science, civil engineering, aeronautical engineering, electrical engineering and engineering mechanics.
