MOTTO

OPERATIONS

42nd Strategic Hospital supported the Wing mission by maintaining the physical and mental well-being of all assigned military and dependent personnel was the primary concern of the base hospital.

The hospital was a 20 bed inpatient facility offering a general medical, surgical and obstetrical care. Construction of a new hospital is currently underway with an expected completion date of November 1987. The move from the prior Green monster had no effect on the mission and continued to offer all services.

Specialties available included Internal Medicine, Optometry, Primary Care, General Surgery, Obstetrics and Gynecology, General Surgery, Pediatrics, Mental Health and Radiology. This wide range of specialties enabled many conditions to be treated locally.

As in all hospitals the Emergency Room was staffed 24 hours to handle emergency cases. Ambulance availability is unrestricted on base, but off base response is permitted no further than the intersection of route 89 from either gate. Services also included a well-stocked pharmacy and a clinical laboratory.

For Patient Advocate concerns CHAMPUS or any other medical administrative patients contacted the Patient Affairs on duty. Outpatient care was provided through the Primary Care Clinic and selected specialty clinics. Services were provided on an appointment basis. The hospital provided up to date care, and the staff ensured that your tour on Loring was a healthy and safe one.
