OPERATIONS

In 1977, Air Training Command realigned its training structure along traditional military lines. Lowry's school became the 3400th Technical Training Wing on April 1, 1977. The training departments were now designated Technical Training Groups: 3420th, intelligence; 3430th,

audiovisual; 3440th, logistics; 3450th, avionics; 3460th, munitions. On September 1, 1978, Lowry—and the other schools within Air Training Command—adopted the eight-hour classroom day. This represented a change from the six-hour academic day in effect since World War II. Although there were other organizational changes at the technical school, the basic wing-group arrangement continued into the 1980s.
