EMBLEM

EMBLEM SIGNIFICANCE

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The Standard Systems Center is depicted by the Polaris star, providing guidance to subordinate organizations. The computer is representative of the equipment central to the unit's mission. The five pointed stars represent the units served by the organization. The globe, indicative of the unit's worldwide mission, is separated into quarters symbolizing the balance of power and

communications. The lightning bolts represent enhanced communications support to the four corners of the world. The latitudinal and longitudinal lines illustrate proper orientation and positive control of communications systems. The yellow triangle symbolizes the combination of excellent hardware, software, and personnel comprising the center.

MOTTO

NICKNAME
