

1 FIGHTER WING

MISSION

The 1 Fighter Wing is composed of the 1 Operations Group and 1 Maintenance Group, and responsible for delivering F-22 Air Power worldwide on short notice to support Combatant Commander taskings.

LINEAGE

1 Fighter Wing established, 28 Jul 1947
Organized, 15 Aug 1947
Redesignated 1 Fighter Interceptor Wing, 16 Apr 1950
Inactivated, 6 Feb 1952
Redesignated 1 Fighter Wing (Air Defense), 14 Sep 1956
Activated, 18 Oct 1956
Redesignated 1 Tactical Fighter Wing, 1 Oct 1970
Redesignated 1 Fighter Wing, 1 Oct 1991

EMBLEM

1 Fighter Wing emblem: Vert, five bendlets enhanced sable fimbriated or, as many crosses patee in bend debased three and two of the second fimbriated argent. On 21 Jan 1924, the Adjutant General approved the 1 Pursuit Group's emblem. The emblem was designed with the unit's history in mind. The green and black colors represented the colors of the Army Air Service, the five stripes signified the original five flying squadrons, and the five crosses symbolized the five major World War I campaigns credited to the Group. (Approved for 1 Group, 10 Feb 1924 and for 1 Wing, 22 May 1957)

MOTTO

MUT VINCERE AUT MORI-Conquer or Die

OPERATIONS

The 1 Fighter Wing was activated at March Field and assigned to Twelfth Air Force and TAC on 15 August 1947. Headquarters, 1 Fighter Group and the 27th, 71, and 94th Fighter Squadrons were assigned to the wing as its tactical component on the same date. The wing's subordinate maintenance, supply, and support organizations were also organized on 15 August. These included Headquarters, 1 Maintenance & Supply Group; Maintenance Squadron, 1 Maintenance & Supply Group; Supply Squadron, 1 Maintenance & Supply Group; and Headquarters and Headquarters Squadron, 1 Airdrome Group, with six component squadrons, designated A-F, which handled communications, security, civil engineering, food services, transportation, and base services.

In early April 1948, Headquarters, Twelfth Air Force issued a mission statement for the 1 Fighter Wing. Its complexity reflected both the wide range of the wing's responsibilities and the experimental nature of its work with new aircraft and new organizational forms. The mission statement directed the wing to: Prepare and assign missions to all units of the 1 Fighter Wing. Attain and maintain the highest efficiency within the means available. Maintain a highly mobile organization at all times. Provide units for demonstration missions in accordance with directives

from higher headquarters. Cooperate with 12 AF, TAC, and other Air Force organizations in developing, testing, and improving the equipment, tactics, and techniques of fighter aviation. Assume direct responsibility for units assigned or attached to the 1 Fighter Wing. Aid in the development of air-ground cooperation techniques and doctrines, and to conduct training necessary for operation with ground and other Air Force units. Provide units for active support of other commands for defense missions. Prepare personnel designated by higher headquarters for overseas movement.

The wing supported Operation Haylift, a humanitarian effort to deliver food to snowbound cattle in the western United States, 1949.

After a winter notable only for a fire of suspicious origin that destroyed the group headquarters building on 25 February 1950, the wing embarked upon yet another series of organizational changes in the spring. Effective 16 April 1950 the 1 Fighter Wing was redesignated the 1 Fighter-Interceptor Wing, the same designation that was simultaneously applied to the group and its three squadrons. The wing had, some days previously, been relieved from its attachment to the 22d Bombardment Wing.

In October 1962 the wing responded to the Cuban Missile Crisis by deploying aircraft, support personnel, equipment and supplies to Patrick Air Force Base, Florida, and Volk Field, Wisconsin. From 19 October through 27 November wing aircraft flew 620 sorties and 1,274 hours, most from Patrick AFB, while maintaining a mission-ready rate of approximately eighty percent." Wing life reverted to more normal training routines at year's end, and the pattern continued through 1963 and 1964.

Beginning in about 1965 the wing began to transfer pilots to other units in or enroute to Vietnam. While the wing itself did not participate in the war, its units were soon manned by personnel who had completed tours in Southeast Asia. Wing dining-ins held periodically for the rest of the decade invariably featured a presentation ceremony where personnel received various awards and commendations they had earned overseas.

On 23 December 1970, TAC revised the primary mission of the 1 TFW from that of an operational wing to that of a replacement training unit (RTU). The war in Vietnam had strained TAC training assets, so the command decided that it needed to convert a line unit to augment its training program. The command selected the 1 because the climate and range facilities in the MacDill area were ideal for the type of flying involved. Colonel Travis R. McNeil, wing commander, concerned that the relegation to RTU status might affect morale, reminded wing personnel that "although in some ways it would seem that the First should be an operational unit, we . . . must approach it in the light that you go to the First and the best when you need help, as TAC does. We can do anything we are tasked to do."

On 1 October 1971, HQ TAC inactivated the 4530th Tactical Training Squadron, which, in addition to other duties, had trained Australian F-4 aircrew members and maintenance personnel during project Peace Reef. The 4501 Tactical Fighter Replacement Squadron, equipped with F-4s,

assumed the 4530th's place in the wing's structure on the same date. The command inactivated the 4424th Combat Crew Training Squadron, the wing's B-57 training unit, on 30 June 1972, leaving the wing with four flying squadrons. All conducted advanced F-4 tactical training.

On 22 May 1975, HQ PACAF directed the movement of the 56th SOW from Thailand to MacDill, without personnel or equipment, effective 30 June. On 6 June, HQ TAC directed Ninth Air Force to move HQ 1 TFW; the 27th, 71, and 94th TFSs; and the 1 Avionics Maintenance, Field Maintenance, Munitions Maintenance, and Organizational Maintenance Squadrons (in active status but without personnel or equipment), from MacDill to Langley, effective 30 June 1975.

The 4500th Air Base Wing at Langley provided support services to the newly arrived wing. The personnel and equipment the 1 TFW left behind at MacDill belonged to the 56th Tactical Fighter Wing.

Wing personnel worked for the next six months to prepare facilities at Langley and to learn the skills necessary to bring the wing to fully operational status. Pilots selected to fly the F-15 completed conversion training at Luke AFB, Arizona, while the command built the wing's maintenance squadrons up to strength with personnel trained to support the aircraft. The wing, now under the command of Brigadier General Larry D. Welch, demonstrated flexibility and resilience in its response to the construction, maintenance, operational, and training problems that developed, and by the end of 1975 Langley was ready to begin receiving its Eagles. Lieutenant Colonel John Britt, operations officer of the 27th Tactical Fighter Squadron, flew aircraft 74-0137, a two-seat TF-15 (later designated F-15B), into Langley on 18 December 1975. The official welcoming ceremonies, dubbed "Eagle Day," were not held until 9 January 1976, when Lieutenant Colonel Larry Craft, commander of the 27th, arrived with a single-seat F-15, 74-0083. Aircraft and aircrews arriving throughout 1976, at a programmed rate of eight aircraft per month, enabled the wing to build toward its authorized strength of seventy-two aircraft in three twenty-four plane squadrons. The 27th Fighter Squadron became operationally ready in the F-15 in October 1976. The 71 TFS reached that status in December 1976. This left the 94th as the wing's only squadron not yet operationally ready. Both HQ TAC and the wing anticipated this situation, because once the first two squadrons reached operational status, the TAC pilot training pipeline and the wing and its organizations shifted gears to support operation Ready Eagle, a Tactical Air Command/United States Air Forces in Europe (USAFE) program to provide USAFE with its first operationally ready F-15 wing in the shortest possible time.

The USAFE wing selected to transition to the F-15, the 36th Tactical Fighter Wing, stationed at Bitburg Air Base, Germany, established an operating location at Langley to oversee the maintenance and operations training provided by 1 TFW organizations augmented for that purpose. The 1 provided the 36th with eighty-eight operationally ready pilots and 522 maintenance specialists, who later trained an additional 1,100 maintenance personnel at Bitburg. The Ready Eagle schedule called for the 36th to deploy its first squadron to Germany by 15 April 1977, its third by 30 September. The first squadron actually deployed on 27 April and Ready Eagle was completed by 23 September, when the last European-bound F-15s left Langley. The 94th then completed its build-up toward operationally ready status, reaching that point by

December 1977. By the end of 1977, then, the 1 Tactical Fighter Wing had completed its own transition to a new aircraft while simultaneously providing advanced tactical training for a second F-15 wing.

On 19 April 1976, HQ TAC relieved the 6th Airborne Command and Control Squadron, which flew Boeing EC-135 airborne command posts in support of the Commander-in-Chief, Atlantic Command, from its assignment to the 4500th Air Base Wing and assigned it to the 1 TFW. A year later, on 15 April 1977, the command activated Headquarters, 1 Combat Support Group, and the 1 Services, 1 Supply, 1 Civil Engineering, 1 Security Police, and 1 Transportation Squadrons at Langley. Personnel assigned to the newly activated squadrons came from 4500th ABW organizations inactivated on the same date. The 1 TFW became the host unit at Langley Air Force Base with the inactivation of the 4500th ABW.

Mobility became a cornerstone of the wing's mission as it built up its F-15 strength. Tactical Air Command mission regulations directed the wing to prepare to deploy and operate its aircraft from locations worldwide. As the Air Force's first F-15 wing, the 1 TFW found itself called upon to demonstrate its ability to deploy forces almost as soon as the wing had the required number of aircraft on hand.

After successfully completing several deployments within the United States, the wing was ready to try its hand at more demanding foreign deployments. The 94th Tactical Fighter Squadron deployed eight aircraft to Korea, Japan, and the Philippines from 21 January to 4 March 1978. The 94th and the 71 each deployed eighteen F-15s to the Netherlands from 13 September to 20 December 1978, with the 71 replacing the 94th on 27 October. Personnel from the 94th had barely unpacked their bags before they were off again, this time on a short-notice, sixteen-day, twelve-aircraft show-the-flag deployment to Saudi Arabia (Prized Eagle, 12-27 January 1979). The 27th deployed next, sending eight aircraft to Korea and Japan from 1-28 March 1979. Further deployments, to exercises within the continental United States, and to Europe, the Middle East, Southwest Asia, and the Pacific, have followed since then.

Since Mar 1991, continued deployments of full and partial squadron elements on a rotational basis primarily to Southwest Asia as part of peacekeeping forces.

The training and experience gained, especially from Prized Eagle, was called upon in the summer of 1990, when Iraqi forces invaded Kuwait. On 7 August 1990, the 27th and 71 Tactical Fighter Squadrons began deploying to Saudi Arabia in support of the defense of Saudi Arabia from further Iraqi aggression entitled Operation Desert Shield. In all, the Wing deployed 48 aircraft to the Persian Gulf. By 16 January 1991, when Desert Shield came to a close, the Wing amassed 4,207 sorties. At 0115 local Saudi Arabia time, on 17 January 1991, 16 wing F-15s departed King Abdul-Aziz Air Base and headed toward Iraq to participate in Operation Desert Storm, the liberation of Kuwait from the Iraqis.

On 15 March 1992, the 74th Air Control Squadron was transferred to the 1 Fighter Wing. The

74th provided command and control of air operations for worldwide operations. One year later, on 1 February 1993, the 41 and 71 Rescue Squadrons, and the 741 Maintenance Squadron were assigned to the 1 Fighter Wing. Stationed at Patrick AFB, Florida, the units provided search and rescue for NASA's space shuttle missions, and support of combat search and rescue operations in Southwest Asia. Additionally, C-21 operational support aircraft were assigned to the Wing on 1 April 1993 with the establishment of Detachment 1, 1 Operations Group. On 1 May, the detachment inactivated and the 12th Airlift Flight, with the same mission, activated.

Two realignments ordered by Air Combat Command took effect on the same day, 1 April 1997. The most substantial one had been the 1 Rescue Group's reassignment to the 347th Wing at Moody Air Force Base. This move meant the loss of two types of aircraft, the HC-130P and the HH-60G. When the Air Force decided to transfer 12th Airlift Flight to Air Mobility Command, another type of aircraft, the C-21, was removed from the 1 Fighter Wing's possession exactly four years after it had been assigned.

Tested the Air Expeditionary Force (AEF) rapid deployment concept, Apr-Jun 1996. For several months following Sep 11, 2001, performed homeland defense operations, maintained aircraft on alert, and flew combat air patrol missions.

Deployed units and elements to support the war against terrorism. First wing to implement the Combat Wing Organization reorganization in 2003.

Received first F/A-22 Raptor aircraft in 2005. In 2010, discontinued flying F-15 aircraft after thirty-five years.
